IN THE SPECIFICATION

1. Please amend the title on page 1 of the application as follows:

<u>VOLTAGE</u> SUPPLY CIRCUIT <u>FOR REDUCING</u> POWER LOSS THROUGH A GROUND CONNECTION

2. Please amend the abstract on page 8 of the application as follows:

A circuit emprises includes a first transistor JFET (21) connected in series to a second transistor JFET. (22) wherein a A gate (26) of the first transistor JFET (21) is connected to a source of the second transistor JFET. (22) and is The gate of the first transistor may also be connected to a load (30) and is may not be connected to ground. The A gate of the second transistor JFET (22) is may be connected to ground. The transistors JFETs are preferably formed by silicon on insulator integration technology.
